

Ignilyte™

Bioelectric power for your skin

A biotech ingredient that activates the skin's natural regeneration system through bioelectricity, without devices.

- Reactivating skin bioelectrical pathways
- Mimicking device-based electrostimulation - naturally
- Activation of cellular electrogenic gates (P2X receptors)
- Clinical results for eye contour and facial rejuvenation, comparable to devices

Hylocereus undatus

An innovative phytocomplex from Pitahaya stem cells that blooms at night, boosting the skin's bioelectrical pathways and enhancing intracellular delivery of bioactives to promote regeneration.

2-steps mechanism of action

IGNILYTE™ SYNERGISTIC ACTIVE MOLECULES

The door openers

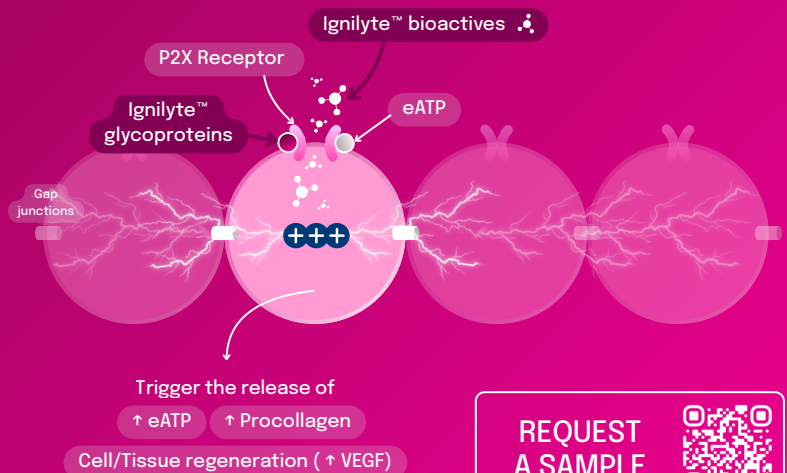

Plant Electrines™

Glycoproteins and electrolytes

The regenerators

Bioactive molecules

Polyphenols and pigments
